

Centralized Visibility of Outsourced Maintenance

Capt Wilson
4th EOM WIPT #3
22-24 May 2001

Session Objective

Identify “To-Be” process and data element requirements to capture and manage centralized visibility of outsourced maintenance

Why?

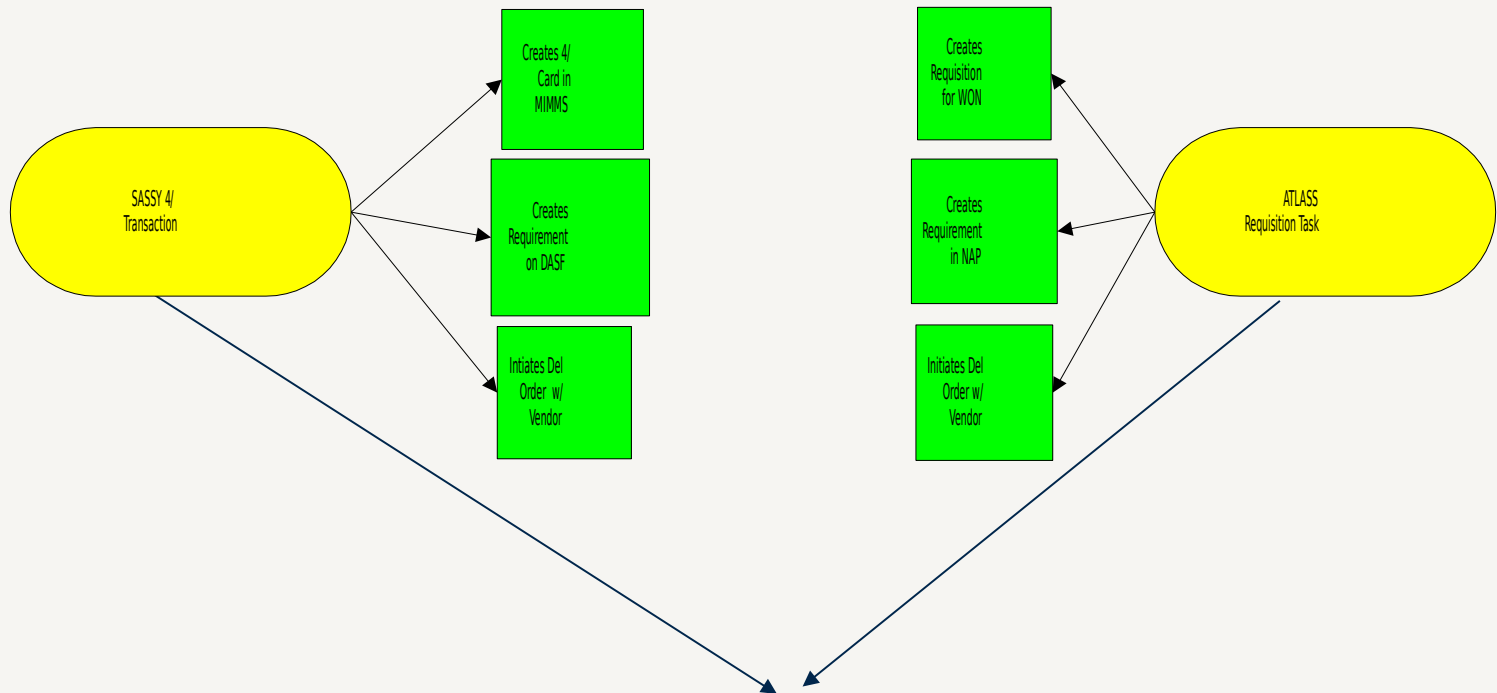

- **Accountability of outsourced maintenance**
 - **Capture maintenance/reliability data (i.e. RCT, demand)**
 - **Tool to assist with contract management and Centralized SECREP management efforts**
-

Centralized Visibility Objectives

- **Standardize the process**
- **Streamline effort (reduce tasks)**
- **Single database with enterprise-wide visibility of maintenance for Secondary Reparables floated throughout the RIP**

Current Outsource Visibility Process

- **ERO/WON**
- **DASF/NAP**
- **Local Databases**
